

APPENDIX – Invasive Species List

Texasinvasives.org maintains an online database devoted to plants known to occur in or around Texas that are suspected of causing invasive problems. Some of the species on this list are economically important horticultural plants **but** cause problems when they escape and establish in natural areas.

Disclaimer: This plant list is only a recommendation and has no legal effect in the state of Texas. It is lawful to sell, distribute, import, or possess a plant on this list unless the Texas Department of Agriculture labels the plant as noxious or invasive on the Department's plant list.
